

# Join the Solar revolution with tailor made solutions

---

**STI Energy is a technology and innovation based company, that offers solutions to businesses, with internal improvement strategies and mindsets.**

Our solutions are tailor made around your businesses usage of energy and the current consumption pattern of electricity. This can be used to bring a saving to the business without it spending months trying to understand how renewable solutions, equipment and maintenance, Insurance and operations work before they can make a decision on a saving strategy.

STI will provide a service in which your business does not need to stress about upfront capital outlay, no monthly installments for years on end, or maintenance, insurance and operations on technology that is beyond the scope of the business.

# We allow you to enjoy savings from tried and tested technologies while you focus on growing your business

STI uses partner funds who install, maintain and operate a solar solution and supply you with cheaper and cleaner energy for the next twenty years by using tier one installers and tier one OEM equipment to deliver the best possible solution - done right the first time.
